

Produmax is the first UK company to achieve BSI certification to the key aerospace quality standard EN 9100:2016

"This standard is vital for our business as it provides our customers with the comfort that we deliver quality products on time, and that we have the necessary processes in place to manage and reduce risks."

Jerem Ridard,
Managing Director, Produmax

Benefits of certification

- Meets aerospace industry requirements for an effective, audited quality management system
- Ensures regulatory compliance and helps to mitigate risk
- Improves efficiency, saving time, money and resources
- Involves, engages and motivates staff
- Facilitates continual improvement and monitoring of processes
- Increases market opportunities by demonstrating excellent levels of traceability throughout the supply chain
- Boosts performance and provides a competitive edge

At a glance

Produmax is a specialist UK manufacturing company with expertise in high precision engineering. Operating globally, it works in partnership with many of the most prestigious aerospace manufacturers to produce high quality machined components and assemblies. It is the first UK company to be independently assessed by BSI to achieve certification to EN 9100:2016 Quality Management Systems – requirements for aviation, space and defence organizations – and is also the first organization globally to be registered on the Online Aerospace Supplier Information System (OASIS) to EN 9100. Certification by BSI to the new standard clearly demonstrates Produmax's commitment to quality and customer satisfaction.
